1. Background and Purpose

Chautauqua Lake (Lake) is situated in Chautauqua County (County) and is the largest inland lake in western New York. Wastewater facilities surrounding the Lake include five sewer districts, four publicly owned treatment works (POTW), pumping stations, privately owned wastewater treatment systems, and approximately 1,200 individual septic systems. Figure 1.1 shows the current Chautauqua Lake Sewer Districts.

In 2004, the New York State Department of Environmental Conservation (NYSDEC) designated the Lake as an impaired water body per Section 303(d) of the federal Clean Water Act and a Total Maximum Daily Load (TMDL) phosphorus allocation was subsequently determined in 2012. The NYSDEC identified various sources that contributed to the Lake's phosphorus levels, one of which was private septic systems utilized by properties not served by a POTW. Many of the septic systems that serve shoreline property around the Lake do not meet current standards and are nearing the end of their useful life. In 2014, a Sewage Integrated Management Plan was prepared that identified various potential improvements including the extension of public sewers to unsewered areas around the Lake.

As a result, the South Chautauqua Lake Sewer District (SCLSD) began the necessary planning and prepared a Sewer Extension Report in 2015 to extend sewers north along New York State 394 to the southern boundary of the North Chautauqua Lake Sewer District (NCLSD). Phase 1 of the Westside Sewer Extension was initiated in 2017 and the SCLSD was extended to the Hamlet of Stow. Construction of the Phase 1 facilities is ongoing, and work is anticipated to be complete in early 2024. The SCLSD is now ready to initiate Phase 2 of the Westside Sewer Extension (Phase 2 Extension), which involves extending the district from the Hamlet of Stow to the NCLSD. Figure 1.2 shows the location of the SCLSD Phase 2 Westside Sewer Extension.

The purpose of this report is to provide the necessary data required for the Phase 2 Extension of the SCLSD pursuant to Article 5A of New York County Law. The SCLSD is being extended to implement the design and construction of wastewater collection and conveyance facilities in response to a TMDL for phosphorus issued for Chautauqua Lake in 2012, and to provide an environmentally sound alternative to the reliance on septic systems by the residents along the western shore of Chautauqua Lake. The project will also provide long-term public health benefit by protecting area water resources, including Chautauqua Lake, groundwater, and local streams and creeks. The extended district will continue to be known as the SCLSD and the facilities to be constructed will be owned by Chautauqua County and operated by the SCLSD. The information provided below includes a description of the proposed improvements, associated costs, and estimated charges to affected properties.

2. Area to be Served

The boundary of the Phase 2 Extension will be comprised of properties on the western shore of the Lake in the Towns of North Harmony and Chautauqua, generally along New York State (NYS) Route 394, from the Hamlet of Stow to the NCLSD, and west along Davis Road from NYS Route 394 to Camp Prendergast. The proposed wastewater collection and conveyance facilities extend the public sewer and will provide direct benefit to an estimated 358 developed parcels and 164 undeveloped parcels. Figure 2.1 shows the boundary of the extended district, and a detailed description is provided in Appendix A.

3. Description of Proposed Facilities

3.1 General Description

The proposed improvements include the construction of a new low-pressure force main sewer system with approximately 54,600 linear feet of new force main, 25,000 linear feet of service laterals, one sewage pumping station, two duplex pumping stations, 11 booster stations, and 250 grinder pumping stations. The locations of the proposed improvements are shown on Figures 3.1, 3.2 and 3.3. A general description of the proposed improvements is provided in Table 3.1.

Table 3.1 Description of Proposed Improvements

Description	Pipe Size (Inches)	Type	Length (Feet)
West Lake Road (NYS Route 394) (NYS Route 86 to Magnolia Road)	8	Collection	13,500
West Lake Road (NYS Route 394) (Magnolia Road to Davis Road)	4	Collection	5,600
Davis Road (West Lake Road to Camp Prendergast)	4	Collection	4,500
Wells Bay Road, Victoria Road, Woodlawn Avenue, Camp Chautauqua (Sioux Road), Magnolia Road, Snug Harbor Road, and Camp Prendergast	3	Subservice Areas	20,000
Bootey Bay Road, Magnolia Springs Road, Cardinal Road, Eagle Road and Whitney Bay Road	2	Subservice Areas	11,000

Developed parcels will generally be served by a grinder pumping station that connects to a force main located along the road fronting each property. The proposed collection system will connect to an existing 8-inch force main crossing at NYS Route 86, which was installed as part of the Phase 1 extension. The collection system begins as an 8-inch-high density polyethylene (HDPE) force main and transitions to a 4-inch HDPE force main at the proposed Magnolia Sewer Pumping Station where it will continue until it terminates on Davis Road at Camp Prendergast. Subservice areas will be served by either a 2-inch or 3-inch HDPE force main, which will connect to the transmission main through booster pump stations. Camp Chautauqua and Camp Prendergast will connect to the transmission main through duplex pumping stations.

The proposed improvements include one stream crossing and one road crossing. Generally, it is anticipated that crossings will be bored, and a casing pipe installed as required. However, all borings will be designed and constructed in accordance with standard design practices and requirements of the agency of jurisdiction. All pipe installations will have a minimum of 5-foot of cover. Pipe trenches will be bedded with stone or select material in accordance with the pipe manufacturer’s installation recommendations. Backfill material will be in accordance with the applicable highway authority having jurisdiction at the location of the installation.

As part of the flood risk evaluation, the proposed infrastructure was categorized as critical and non-critical equipment located exclusively in non-tidal areas. No critical assets, such as pumping stations, are located within the baseline flood elevation (BFE) of Chautauqua Lake. A number of grinders, typically serving one to two residential homes, will potentially be located within the BFE. Equipment not rated for submerged duty (ex. electrical controls), will be designed two feet above BFE where feasible. In addition, isolation valves will be designed to prohibit flood waters from entering downstream systems.

Properties required to remove private on-site wastewater disposal systems are reflected in Appendix B. Wastewater from the extension area will be conveyed through existing sewer mains to the existing SCCLSD treatment plant, where it will be treated and managed pursuant to existing procedures.

3.2 Project Schedule

Construction of the proposed improvements is anticipated to begin in 2024 after project design, regulatory review, bidding, and award have been completed. The anticipated project schedule is shown in Table 3.2. The anticipated project schedule is subject to changes and modifications.

Table 3.2 Anticipated Project Schedule

Task	Start Date	Completion Date
District Extension	Spring 2022	Summer 2022
State Comptroller Review	Summer 2022	Fall 2022
Project Financing	Summer 2022	Winter 2022
Project Surveys	Spring 2023	Fall 2023
Project Design	Spring 2023	Spring 2024
Regulatory Review	Spring 2024	Summer 2024
Bidding and Award	Summer 2024	Fall 2024
Construction	Winter 2024	Winter 2026

4. Estimated Cost of Facilities

4.1 Capital Cost

The estimated cost to construct the proposed improvements is \$24,000,000 based on GHD’s experience with the design, bidding, and construction of Phase 1. Contractor bid prices and item quantities from Phase 1 were utilized to form the baseline for Phase 2 construction estimates and escalated 3 percent annually, assuming construction will begin in 2024. These costs are based on SCLSD obtaining the services of a private construction contractor, a financial advisor, an engineer licensed in the State of New York, and legal counsel. A summary of the Engineer’s Opinion of Probable Capital Cost is shown in Table 4.1.

Table 4.1 Engineer’s Opinion of Probable Capital Cost

Item	Estimated Cost (2024 dollars)
Force Mains	\$7,300,000
Grinder Pumps and Discharge Laterals	\$7,100,000
Booster Pumping Stations	\$1,300,000
Main Pumping Station	<u>\$800,000</u>
Estimated Construction Cost:	\$16,500,000
Construction Contingency (25%):	<u>\$4,000,000</u>
Total Construction Cost:	\$20,500,000
Engineering, Legal & Administrative:	<u>\$3,500,000</u>
Total Cost of Proposed Improvements:	24,000,000

4.2 Operation and Maintenance

The Phase 2 Extension involves the construction of a new low-pressure force main sewer system to collect and convey wastewater from the proposed service area to the SCLSD POTW for treatment. Upon completion, the proposed facilities will be operated and maintained by SCLSD. Operation and Maintenance (O&M) costs include wages and salaries, employee benefits, utilities, equipment, supplies and repairs to maintain sufficient service levels for the collection, conveyance, and treatment of wastewater. The estimated first year O&M cost to operate and maintain the proposed facilities is \$153,500. These costs are based on the estimated effort to operate and maintain current facilities and that a similar level of effort will be required to operate and maintain the proposed facilities.

5. Estimated Annual Use Fee

The annual cost of the extended district includes O&M expenses and debt service costs associated with the capital financing of the proposed improvements. The revenue required to meet the annual cost of the proposed facilities will be recovered through a user fee, which will be assessed on an Equivalent Dwelling Unit (EDU) basis for new users within the Phase 2 Extension. Therefore, the extended district will be its own zone of assessment and costs will be assessed to properties that directly benefit from the construction of the proposed facilities. A complete listing of tax parcels with property addresses is included in Appendix B.

Residential property will be assessed one (1) EDU per residential unit, non-residential property is determined based on metered water usage, campgrounds are assessed ½ EDU per recreational vehicle (RV) hook-up site and vacant parcels are assessed a flat fee of \$100 per year. The proposed extension district is currently served by private well systems so sufficient water usage data was not available for non-residential property. Therefore, water usage was estimated based on the NYSDEC Design Standards for Intermediate Sized Wastewater Treatment Systems. A total of 441.2 EDUs have been estimated for new users within the extended district based on available tax map information and an estimate of water usage for non-residential property where required. The SCLSD Unit Assessment Table is included in Appendix C, which outlines how residential, non-residential, and vacant properties are proposed to be assessed. A general summary of tax parcels and EDU's is shown in Table 5.1.

Table 5.1 Summary of Tax Parcels and EDUs

Description	Tax Parcels	EDUs
Single Family Residential	319	317
Multi Residential	3	8
Occupied Agricultural	0	0
Campgrounds	3	93
Non-Residential	31	23.2
Vacant	164	0
Total	520	441.2

5.1 Capital Financing

The capital financing includes the cost associated with the design and construction of the proposed improvements. It is anticipated that the project will be funded in part with state and federal grant monies from the County, with the balance of the capital costs financed over 30 years at an interest rate of 0 percent through the New York State Environmental Facilities Corporation (NYSEFC) Clean Water State Revolving Fund program. The SCLSD intends to use \$15,000,000 from grant funds in conjunction with a \$9,000,000 bond from NYSEFC to fund the project. The total annual debt service associated with NYSEFC financing is estimated at \$300,000. User fees from vacant parcels will

offset the annual debt service requirement by approximately \$16,400, and the amount to be recovered from occupied parcels is approximately \$283,600. Therefore, the estimated annual cost per EDU is \$646. A summary of the capital financing and cost per EDU is shown in Table 5.2.

Table 5.2 *Estimated Project Financing*

Category	Amount
Maximum Amount to be Financed	\$24,000,000
Less State and Federal Grants	(\$15,000,000)
Maximum Amount to be Bonded	\$9,000,000
Estimated Annual Debt Service (EFC Financing – 30 years at 0%)	\$300,000
Less Revenue from Vacant Parcels	(\$16,400)
Revenue to be Recovered from EDUs	\$283,600
Capital User Fee Per EDU	\$646.00

5.2 Operation and Maintenance

The estimated first year O&M costs for the proposed facilities is \$153,500, which is \$348 per EDU. However, the SCLSD assesses an O&M fee for the cost of operating and maintaining all collection and conveyance facilities, including the SCCLSD POTW. The current user fee is \$354 per year per EDU and is assessed to all connected customers in the SCLSD. Therefore, the Phase 2 Extension is anticipated to generate approximately \$156,200 in revenue from this fee and is sufficient to cover the estimated increase in O&M costs.

5.3 Total Estimated Annual User Fees

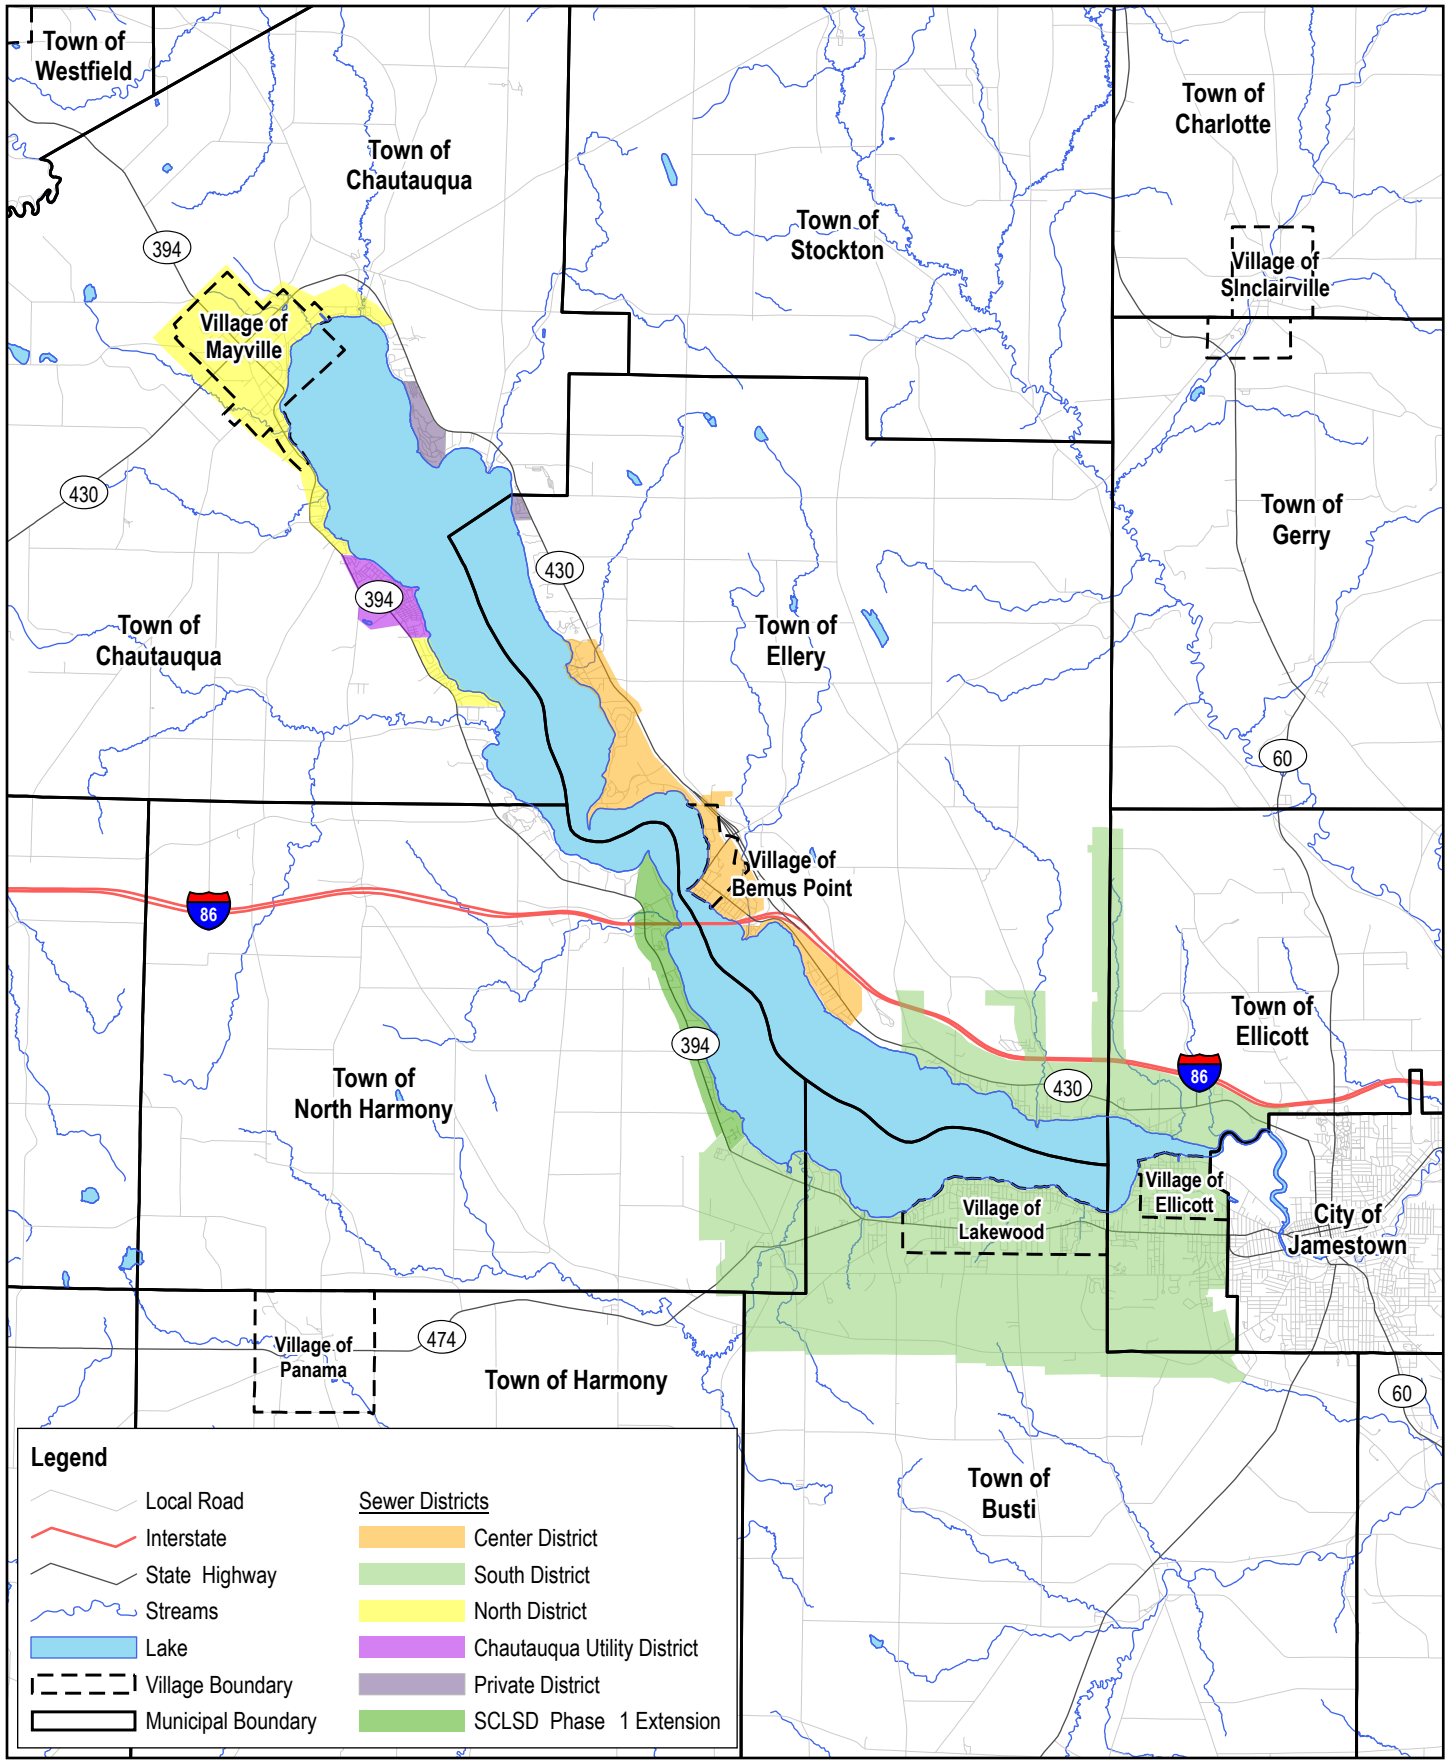

The estimated total annual cost of the Phase 2 Extension is \$456,200 and assumes that state and federal grant monies will be made available to offset the capital construction cost of the proposed facilities. The estimated annual cost per EDU is \$1,000, which includes \$646 per EDU for capital costs and \$354 per EDU for O&M costs associated with the collection, conveyance, and treatment of wastewater. Therefore, property tax parcels assessed at one (1) EDU will pay \$1,000 per year, properties with assessments greater than one (1) EDU will pay an equivalent annual cost per EDU and vacant properties will pay a flat fee of \$100 per year. Without any grants or the availability of stimulus funds, the estimated annual user fee for an EDU in the extended district will be approximately \$2,131, which is substantially greater than what an EDU in Phase 1 is scheduled to pay. Therefore, to make the cost for Phase 2 equitable as well as affordable, grant funds in the amount of \$15,000,000 are required. Table 5.3 provides a cost of the extended district and EDU.

Table 5.3 *Summary of Annual Cost and Use Fee per EDU*

Cost Component	Without Grant Funding		With Grant Funding	
	Annual Cost	Cost per EDU ¹	Annual Cost	Cost per EDU ¹
Capital Financing ¹	\$800,000	\$1,777	\$300,000	\$646
O&M	\$156,200	\$354	\$156,200	\$354
Total	\$956,200	\$2,131	\$456,200	\$1,000

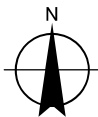

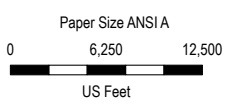

¹ – The cost per EDU includes revenue from vacant parcels, which has been applied to offset the annual cost of debt service payments.

Boundary Description

BOUNDARY DESCRIPTION

ALL THAT TRACT OR PARCEL OF LAND situated in the Town of North Harmony and Town of Chautauqua, County of Chautauqua, State of New York, shown on Figure 2.1 and being further described as follows:

BEGINNING AT THE POINT OF INTERSECTION on the south shore of Chautauqua Lake in the Town of North Harmony at its intersection with the westerly line of the Phase 1 Sewer Extension as described in the Sewer District Extension Report, dated September 2017 and entitled "Sewer Extension through the Hamlet of Stow for the West Side of Chautauqua Lake," said point also being the division line between current Section Block and Lot (SBL) tax parcel number 332.0-2-14 on the east and SBL tax parcel number 332.11-1-17.3.2 on the west; Thence

Southwesterly along the said division line and on the westerly line of the Phase 1 Sewer Extension to a point in the center of New York State Route 394 right-of-way; Thence

Southeasterly in the center of New York State Route 394 right-of-way on a curve to the right an approximate distance of 845 feet more or less to a point in the center of the Stow Road right-of-way; Thence

Southwesterly along the center of Stow Road right-of-way 570 feet more less to a point in the center of Stow Road right-of-way; Thence

Northwesterly to a point in the northerly right-of-way of Stow Road said northerly line being 500 feet westerly offset from and at all points parallel to the westerly right-of-way of New York State Route 394; Thence

Northwesterly continuing along the said 500-foot westerly offset line crossing the rights-of-way of Carpenter Pringle Road, Morley Road and Magnolia-Stedman Road crossing into the Town of Chautauqua to a point being 500 feet southerly offset from all points parallel to the southerly right-of-way of Davis Road; Thence

Westerly along the said 500-foot southerly offset line to a point in the westerly line of SBL tax parcel 314.00-1-14, said point also being the division line of SBL tax parcel 314.00-1-14 on the east and SBL tax parcel 314.00-1-67.1 on the west; Thence

Northerly along said division line to a point in the southerly right-of-way Davis Road; Thence

Continuing in the same northerly direction, across the right-of-way of Davis Road to a point in the northerly right-of-way of Davis Road, said point also being the division line between SBL tax parcel 314.00-1-13 on the east and SBL tax parcel 314.00-1-2.1 on the west; Thence

Continuing in the same northerly direction along said division line to a point in the northerly line of 314.00-1-13, said point also being the southerly line of 314.00-1-4; Thence

Easterly along the northerly line of SBL tax parcels 314.00-1-13, 314.00-1-12, 314.00-1-11, 314.00-1-9, 314.00-1-8, 314.00-1-7 and 314.00-1-22 to a point in the easterly line of 314.00-1-22 being 468 feet northerly offset from all points parallel to the northerly right-of-way of Davis Road, said point also being the division line of SBL tax parcel 314.00-1-4 on the west and SBL tax parcel 314.00-1-6.2 on the east; Thence

Easterly along the said 468-foot northerly offset line to a point in the westerly right-of-way New York State Route 394; Thence

Northerly along the westerly right-of-way 1,190 feet more or less; Thence

Easterly to a point in the center of New York State Route 394 and Prendergast Boulevard right-of-way; Thence

Continuing in the same easterly direction in the center of the right-of-way of Prendergast Boulevard to a point in the center of Manor Drive; Thence

Southeasterly to a point in the westerly right-of-way of Manor Drive, said point also being the division line between SBL tax parcel 297.20-2-23 on the north and SBL tax parcel 314.08-1-1 on the south; Thence

Easterly along said division line to a point in the westerly shore of Chautauqua Lake; Thence

Southerly and easterly along the shore of Chautauqua Lake 19,300 feet more or less crossing into the Town of North Harmony and to the point or place of beginning.

Exclude: 314.00-1-24, 314.00-2-38, 314.00-2-39, 331.00-2-6, 332.00-1-3, 332.00-1-5, 332.00-1-14, 332.00-1-15, 332.00-1-37, 332.00-2-12, 332.00-2-13.2, 332.00-2-42, 332.00-2-44
